THE
CULPEPER

WINE LIST

We love our wines.

The wines on this list are sourced from small artisan growers who work sustainably, organically biodynamically.

Their work starts in the vineyard where they refuse to use any sort of chemical, pesticide or fungicide in the vines.

Horses, goats and chickens are often part of the vines life. The grapes are then selected carefully by hand and fermented without adding or removing anything during the winemaking process.

*It's basically a fermented grape juice. That's all.
And we hope you enjoy them too.*

BY THE GLASS
